Silbrade®

Braid Reinforced Silicone Hose

- Open mesh polyester braiding incorporated within the walls of silicone tubing
- Designed for elevated pressure applications
- Odorless, tasteless, and inert
- Able to resist extreme temperature variation: -99°F to 350°F
- Raw materials meet FDA requirements per FDA 21 CFR 177.2600 for use with food contact surfaces
- Listed by the National Sanitation Foundation (NSF-51) for food and beverage equipment materials
- Free of BPA, latex and phthalates; RoHS compliant
- Reusable — will withstand repeated sterilization
- Translucent natural color for visual contact with the flow
- Excellent weatherability properties — resists U.V., ozone, gases, moisture, and extreme temperatures

Notes

The construction of SILBRADE enables silicone tubing to handle increased pressure applications. SILBRADE offers outstanding resistance to temperature extremes and is made from raw materials that meet FDA requirements.

The flexible design and construction of SILBRADE also allows excellent bend radii and permits installation in restricted spaces without impeding flow. SILBRADE, a peroxide-cured product, contains no sulphur or other acid-producing chemicals thereby eliminating the possibility of staining, corroding, or deteriorating other materials it contacts. It is also resistant to ozone and U.V. over long time periods.

Care is recommended in the selection of fittings and clamps, as sharp barbed fittings or unlined metal clamps could tear into the hose wall and possibly cause a failure, especially at elevated pressures.

SILBRADE may be low pressure steam sterilized in-line or autoclaved at up to 250°F in a normal autoclaving cycle. However, if exposed to repeated steam sterilization or long-term high temperature or pressure, silicone will eventually relax and become gummy. It should then be replaced.

SILBRADE is not recommended for implantable or in-body uses or for continuous steam applications.

Cut coils are available; charges apply — call for details.
Add length suffix to part number when ordering. Example: 100 ft. of 1/8” I.D. x .365” O.D. hose is part number 290 0072-100.
Working pressures are calculated from burst testing using a 3:1 safety factor. Application testing is recommended.

**Bold** indicates the critical dimension for fittings application.

*Limited stock item in 25 ft. length; lead times and minimums may apply — call for details.

Recommended Fittings & Clamps

- Thermobarb® barbed fittings
- Oetiker® ear type clamps
- Kwik Clamp™ nylon double bond hose clamps
- Worm gear clamps

Odorless, tasteless, and inert
Able to resist extreme temperature variation: -100°F to 500°F (350°F maximum for NSF applications)
Meets FDA requirements per FDA 21 CFR 177.2600 for use with food contact surfaces
Listed by the National Sanitation Foundation (NSF-51) for food and beverage equipment materials
Conforms to 3-A Sanitary Standards for Number 18-03 (Multiple Use Rubber and Rubber-Like Materials)
Free of BPA, latex and phthalates; RoHS compliant
Reusable — will withstand repeated sterilization
Translucent natural color for visual contact with the flow
Resilient, stretchable, and resistant to compression set
Good electrical and weatherability properties — resists U.V., ozone, gases, and moisture

**Physical Properties**

- **Resilient, stretchable, and resistant to compression set**: 50
- **Good electrical and weatherability properties — resists U.V., ozone, gases, and moisture**: 50

**Notes**

The most outstanding properties of SILCON are its flexibility and resistance to temperature extremes. These, plus its good electrical properties and ability to self-extinguish, make SILCON an excellent choice for appliances and thermal sleeving.

Peroxide-cured SILCON contains no sulphur or other acid-producing chemicals, thereby eliminating the possibility of staining, corroding, or deteriorating materials it contacts. It is extremely resistant to ozone and U.V. over long time periods.

Care is recommended in the selection of fittings and clamps for SILCON as sharp barbed fittings or unlined metal clamps could tear into the tubing wall and possibly cause a failure.

**SILICON may be low pressure steam sterilized in-line or autoclaved at up to 250°F in a normal autoclaving cycle. However, if exposed to repeated steam sterilization or long-term high temperature or pressure, silicone will eventually relax and become gummy. It should then be replaced.**

*Colors for industrial applications are available through minimum order — call for details.*

**SILICON is not recommended for implantable or in-body uses or for continuous steam applications.**

Silbrade® Medical  Medical Grade Braid Reinforced Silicone Hose
- Open mesh polyester braiding incorporated within the walls of silicone tubing
- Finished product meets USP Class VI requirements
- Able to resist extreme temperature variation: -99°F to 350°F
- Odorless, tasteless, and inert
- Raw materials meet FDA requirements for use with food contact surfaces

Silicon® Med-X  Platinum Cured Medical Grade Silicone Tubing
- Platinum cured for the highest degree of purity (least extractables)
- Manufactured under good manufacturing practices in a controlled environment
- Reusable — will withstand repeated sterilization
- Applications include pharmaceutical, biomedical, health and beauty, food, and beverage handling

Silbrade® Platinum  Platinum Cured Silicone Hose
- Platinum cured for the highest degree of purity
- NSF-51 listed for food equipment materials
- Odorless, tasteless, and inert
- Open mesh polyester braiding incorporated within walls of silicone offers increased pressure capabilities
- Able to resist extreme temperature variation: -100°F to 400°F

Request a Silicone catalog
Inside you’ll find details on all of NewAge Industries’ silicone tubing and reinforced hose. Catalogs for PVC, polyurethane, fluoropolymer, rubber, and semi-rigid tubing and hose are available, as well as barbed fittings and clamps, push-to-connect fittings, and custom products. Contact your NewAge Industries’ sales representative or local distributor to request a copy of the catalog you need, or visit www.newageindustries.com.
